EDUCATION

2013 - 2019

KYIV NATIONAL UNIVERSITY
OF TECHNOLOGIES AND
DESIGN (KNUTD)

- Mechatronics and Computer Technologies
- Graduated with Honors

SKILLS

- Python (FastAPI, Flask, Selenium)
- Asyncio, multiprocessing
- Docker, CI/CD, Nginx, Portainer
- Prometheus, Grafana, Git
- SQL (PostgreSQL, MySQL), Redis
- Celery, RabbitMQ
- REST API, microservices
- Swagger/OpenAPI
- AI (GPT, Claude, Gemini)
- RPA tools (Zennoposter, BAS)
- Blockchain (Solana, Web3)

PROFILE

Python Back-End Developer with 6+ years of experience in microservices architecture (FastAPI, Flask), RPA, and automation. Skilled in developing systems for mobile farms, financial dashboards, and Solana crypto bots. Proficient in Docker, CI/CD, and AI integration (GPT, Claude, Gemini). Strong background in backend development and DevOps, with team lead experience.

WORK EXPERIENCE

Traffic Devils, Kyiv

11.2022 - PRESENT

Python Developer

- Led development of an AI-powered website auto-generation service (GPT, Claude, Gemini)
- Designed and implemented microservices architecture (FastAPI) for mobile farms (Android, TikTok) and Telegram bot integrations
- Engineered scalable admin panels (FastAPI + Jinja2), financial dashboards, and REST APIs
- Built Dockerized environments with CI/CD pipelines (GitLab) for streamlined deployment
- Administered Linux servers, managed domains, SSL certificates, and system monitoring
- Integrated Web3 solutions, developing a Solana crypto copy-trading bot

AcidBro, Kyiv

01.2021 - 11.2022

RPA Python Developer

- Led the automation team, managing multi-project pipelines and task prioritization
- Developed complex automation scripts using Zennoposter, BAS, Selenium, and Android emulation for financial systems
- Created Telegram automation solutions (Pyrogram, Telethon), Google farming bots, and NFT purchasing tools
- Contributed to antidetect browser development to enhance bot resilience
- Oversaw server infrastructure, ensuring stability and performance
- Developed automation frameworks (Selenium) for Facebook and Reddit farming operations
- Built backend API and admin interfaces for Reddit automation workflows

HOBBIES

- Cycling
- Longboarding, wakeboarding
- Tennis (court & table)
- Volleyball
- Running, walking
- Night car rides
- Muay Thai (Thai boxing)
- Webinars, self-development groups
- Programming courses
- Psychology

LANGUAGES

- Ukrainian (Fluent)
- Russian (Fluent)
- English (Technical)

Financial Broker, Kyiv

06.2020 – 01.2021

RPA Developer

- Headed the automation division, overseeing team workflows and deliverables
- Implemented mass account registration and SERM campaigns via Zennoposter
- Set up and maintained mobile proxy networks to support marketing operations

Quora Project, Kyiv

09.2019 – 05.2020

RPA Developer

- Engineered a Telegram service for automated comment boosting and trend monitoring
- Established and scaled Quora account networks, optimizing engagement pipelines
- Configured mobile proxy systems for large-scale account operations

OnlineReputation, Kyiv

10.2017 – 08.2019

Zennoposter Developer & System Administrator

- Designed and maintained automation templates for social media platforms (parsing, posting, engagement)
- Developed and debugged POST/GET request workflows
- Administered office IT infrastructure, including networking and video surveillance systems
